

CMCA MOCKUP

1. Accessing CMCA with caseload alone - displays all the cases and RFAs within the caseload except the denied and withdrawn RFAs

**Note:** The detail lines would not include denied and withdrawn RFAs, but the 'Total Cases and RFAs' at the bottom of the screen would include even the denied and withdrawn RFAs (Total would not match the number of detail lines displayed above).

2. Accessing CMCA with caseload #/C - Cases only within a specific caseload

**Note:** The number of cases displayed in the detail portion of the screen matches the 'Total Cases' displayed at the bottom of the screen.

3. Accessing CMCA with Caseload #/R - RFAs only within a specific caseload

**Note:** The detail lines display all RFAs including the withdrawn and denied. 'Total RFAs' count would match the total number of detail lines displayed for the caseload
